GPS mapping may not be detailed in all areas or reflect current road regulations. <sup>5</sup> Voice recognition disabled when top is down. <sup>6</sup> Parking aid/convenience feature. Cannot completely eliminate blind spots or warn of moving objects. May not detect every object. Always check surroundings before moving vehicle. Not a substitute for proper backing procedures. Always turn to check what is behind you before backing up. <sup>7</sup> The Rear Sonar System is a convenience, but is not a substitute for proper backing procedures. Always turn and check that it is safe to do so before backing up. May not detect every object behind you. <sup>8</sup> Intelligent Cruise Control is not a collision avoidance or warning device. For highway use only and not intended for congested areas or city driving. Will not brake automatically to a stop. Failure to apply the brakes could result in an accident. <sup>9</sup> Brake Assist with Preview Braking is only an aid to assist the driver and is not a collision warning or avoidance device. It is the driver's responsibility to stay alert, drive safely, and be in control of the vehicle at all times. <sup>10</sup> The Advanced Climate Control System with Plasmacluster air purifier helps scrub the air in the vehicle's interior. The system senses exterior odors, suppresses unpleasant interior odors, stops the inflow of external odors and helps keep the cabin smelling fresh, but does not always eliminate odors. <sup>11</sup> 2012 EPA Fuel Economy Estimates. Actual mileage may vary with driving conditions. Use for comparison only. <sup>12</sup> Air bags are only a supplemental restraint system; always wear your seat belt. Even with the occupant-classification sensor, rear-facing child restraints should not be placed in the front-passenger's seat. Also, all children 12 and under should ride in the rear seat properly secured in child restraints, booster seats, or seat belts according to their size. Air bags will only inflate in certain accidents; see your owner's manual for more details. <sup>13</sup> VDC, which should remain on when driving except when freeing the vehicle from mud or snow, cannot prevent accidents due to abrupt steering, carelessness, or dangerous driving techniques. Always drive safely. <sup>14</sup> Tire Pressure Monitoring System is not a substitute for regular tire pressure checks.

# Safety

**Infiniti Safety Shield®** is our comprehensive approach to safety. It includes rigorous crash testing, over 50 standard safety features on every vehicle and available advanced safety technologies. Infiniti Safety Shield® is designed and developed into every vehicle we build to help protect you and your passengers.

**Infiniti Advanced Air Bag System (AABS)<sup>12</sup>** Includes dual-stage front supplemental air bags with seat belt sensors and an occupant-classification sensor which adjust their inflation rate depending on crash severity and seat belt usage. If the front-passenger's seat is empty, a sensor will deactivate the air bag.

**Front Seat-mounted Side-impact Supplemental Air Bags<sup>12</sup>**  
These air bags are placed in the front seat side bolsters so they can move with the seat to help maintain optimal positioning.

**Door-mounted Curtain Side-impact Supplemental Air Bags<sup>12</sup>** Tied into the side-impact sensors, these air bags help give outboard occupants enhanced head protection in the case of a side impact.

**4-wheel Anti-lock Braking System (ABS)** The large, 4-wheel ventilated disc brakes include a 4-wheel, 4-channel Anti-lock Braking System (ABS) to help the driver maintain steering control while braking.

**Brake Assist (BA)** In emergency braking situations, some drivers may not brake hard enough, soon enough. Brake Assist monitors how you apply the brakes and, sensing emergency braking, works with the standard ABS system to apply maximum brake pressure for potentially shorter stops.

**Electronic Brake force Distribution (EBD)** To help optimize braking performance for a variety of vehicle loads, EBD adjusts the amount of brake force applied to the front and rear wheels for improved braking performance, reducing front-end "dive" during braking and more even brake wear. Infiniti's Electronic Brake force Distribution (EBD) system detects vehicle-load conditions, such as passengers and luggage, and distributes additional brake pressure to the rear brakes as needed.

**Traction Control System (TCS)** Integrated with Vehicle Dynamic Control, the Traction Control System (TCS) senses wheel-spin and automatically reduces engine output and/or brakes the spinning wheel to help improve traction.

**Vehicle Dynamic Control (VDC)<sup>13</sup>** Acting in tandem with the Traction Control System, VDC compares actual vehicle cornering performance to the driver's input, adjusting power levels and/or applying appropriate brake pressure to individual wheels to help correct oversteer or understeer, helping keep the vehicle on the steered path.

**snug4kids™ Snug Kids®** The first venture of its kind, Snug Kids is our online guide to selecting and correctly installing a child restraint seat for your Infiniti automobile. Our safety engineers evaluated numerous child restraint seats, installing them in every Infiniti car and SUV. Visit [InfinitiUSA.com/snugkids](http://InfinitiUSA.com/snugkids) to view or download the results.
